sodium alginate-based  
nutritional supplement

# NATALGIN

## Safe and effective radiation protection

NATALGIN is a nutritional food supplement consisting of sodium alginate from brown algae.

Its main biologically active compound is alginic acid which is capable of absorbing heavy metals and radionuclides.

The antiradiative potency of NATALGIN is based on the specific effect sodium alginate has on blood cell membranes, gastric and intestinal mucosa, increasing their resistance to irritants.

NATALGIN has anti-inflammatory, antacidic, coating activity.

NATALGIN is not toxic, it does not have allergizing, embryotoxic or mutagenic effect.

## Use

-  supporting the immune system in case of its imbalance (after surgery, infections, burns, medications), autoimmune diseases or allergies;
-  treatment of gastrointestinal diseases (gastroduodenal ulcer, erosive gastritis, chronic gastroduodenitis);
-  prevention and treatment of nephropathies caused by harmful environmental factors and of microbial and inflammatory urinary tract diseases;
-  prevention and treatment of consequences of radiation therapy and chemotherapy;
-  treating oncological patients (with leukopenic complications, acute and chronic conditions of gastrointestinal mucosa);
-  combination therapy of consequences of exposure to high radiation (leukopenia, anemia, gastroduodenal ulcer, erosive gastritis, hyperacid syndrome);
-  elimination of toxins, heavy metals and radionuclides as an intestinal sorbent;
-  prevention and treatment of consequences of intake of food, water and air highly contaminated of salts of heavy metals.

Name		Net weight	Number of items enclosed	Price per item	Storage conditions and shelf life
Natalgin, 20 packs x 1 g		20 g	54 pcs.	6,3 \$	At a temperature between 5°C and 30°C, without exposure to direct sunlight. Shelf life: 3 years
Natalgin, 60 capsules		36 g	40 pcs.	11,1 \$	At a temperature between 5°C and 30°C, without exposure to direct sunlight. Shelf life: 3 years
